

EXPORT OPERATIONS

COMPLETE MANAGEMENT FOR THE LIFECYCLE OF EXPORTS

OCR Solutions Export Operations

Complete Management for the Lifecycle of Exports

OCR Export Operations helps ensure proper compliance and improves operational efficiencies with enhanced status tracking capabilities and management of all export processes. The Export Operations solution supports order creation, shipment consolidation, automated trade compliance validations including denied party screening and license determination, required document generation and integration with logistics providers.

Key Benefits

- Automate screening for denied parties and export license requirements
- Manage orders and shipments through integration with ERP systems
- Improve export efficiencies with templates and standard shipping documents
- Process bookings with major carriers such as DHL, FedEx, UPS
- Gain valuable insight and drive decision making through configurable real-time dashboards
- Leverage transaction data for customs filing in ACE including connectivity to global customs agencies

Key Capabilities

- Utilize global trade content to manage exports and re-exports subject to extra-territorial jurisdictions
- Track export authorizations across multiple orders and shipments
- Configure alerts to improve visibility and streamline the decision-making process
- Generate required documents for country of export and country of import
- Automated generation and distribution of documents to multiple parties
- Configure Destination Control Statements for your business or product jurisdiction and classification
