

Export Operations

Empower Your Export Compliance with Seamless Automation Compliance and Global Trade Success.

The Descartes OCR Global EASE™ Export Operations module streamlines export processes by automating compliance validations and generating accurate documents, reducing errors, and ensuring regulatory adherence. This robust system integrates seamlessly with your supply chain operations, managing orders and shipping transactions efficiently.

With advanced automation and real-time screening tools proactively identify risks, validate trade licenses, and ensure shipments meet international export control regulations. Smoother operations with solutions designed for precision and reliability needed for effective global trade management, streamlining export operations and supporting seamless, compliant transactions. Focus on strategic tasks and manage your supply chain with confidence, knowing that a reliable system supports your export activities, enhances compliance, and ensures smooth, error-free operations.

Solution Area

Global Trade Intelligence

About the Product

Enhance supply chain velocity with robust global compliance controls, customizable workflows, and seamless integration with external and internal systems to ensure seamless data exchange and process automation to minimize errors, enhance compliance, and improve operational efficiency.

TOP BENEFITS

- Enhance compliance and risk mitigation by adhering to global export regulations.
- Expedite shipments with seamless ERP and carrier integrations.
- Optimize audit readiness with comprehensive reporting tools.
- Save time using templates and pre-populated data.
- Enhance collaboration with real-time updates and dashboards.

Streamline Export Processes with Configurable Workflows, Robust Compliance Tools, and Real-Time Insights.

The Descartes OCR's Global EASE Export Operations module offers a comprehensive, web-based solution for managing export compliance and documentation. The module adapts to evolving trade regulations, ensures adherence to International Traffic in Arms Regulations (ITAR)/ Export Administration Regulations (EAR) regulations, and maintains a detailed audit trail. Its key features such as user-friendly interfaces, ERP integration, transaction-level screening, and robust report generation can maximize efficiency, compliance, and accountability in your supply chain operations.

FEATURES

Global Compliance Screening

Screen orders and shipments against trade sanctions and embargoes, and global export control regulations.

Customs Filing Automation

File directly with ACE via AES-Direct or through batch submissions via SFTP for seamless customs clearance.

ERP Integration

Integrate with SAP, Oracle, MS D365, JD Edwards, and more for real-time data exchange.

Carrier Integration

Connect with logistics providers (FedEx, UPS, DHL) via web APIs for rate comparison, booking and tracking packages.

BENEFITS

Enhanced Productivity

Enhance supply chain efficiencies through increased automation of trade compliance processes.

Improved Compliance and Risk Management

Proactively manage trade risks through automated screening against trade sanctions and embargoes.

Enhanced Reporting and Compliance

Support audits with robust reports and automated validations to ensure compliance and manage trade risks.

Cost Optimization

Minimize transactional costs through direct customs filings and efficient bookings with carriers.
